

Get Your Medical Device Ready for Manufacturing

Even if you've already found a manufacturer for your medical device, there are still a number of things you'll need to bring to the table to help them make your product successfully.

You'll Need:

- ✓ A Complete Design Package
- ✓ A Well-Defined Testing Plan
- ✓ A Clear Understanding of Regulatory Requirements

Don't have all of this yet? That's OK. That's where we come in.

What Working Together Looks Like

1

Start with a Conversation

We'll start with an intake call where we learn about your goals and walk you through the key parts of the process.

2

Move Forward in Stages

You'll receive a staged development proposal that helps you track progress and focus on what is needed at each step.

3

Have a Dedicated Guide

You'll work directly with an in2being project manager who supports you from kickoff through completion.

4

Follow a Clear Process

We'll move through a step-by-step approach tailored to your specific device, goals, and development needs.

Our Core Capabilities

Prototype Development

Detailed Design

Software Development

Testing & Validation

Regulatory Strategy

US FDA Submissions

Project & Vendor Management

When you're ready for the next step, we're here to help.

Why Work with in2being?

Expert Product Development

Get experienced guidance through the complexities of medical device development. in2being helps you move forward with practical support at every stage.

Integrated Regulatory Support

Get product development and FDA strategy aligned from the start. in2being helps you move forward with greater clarity and fewer unexpected delays.

A Clear Path Forward

Get a clearer path to manufacturing and submission. in2being helps you reduce risk, stay on track, and prepare with confidence.

Real Experiences from Our Clients

These are folks who understand the space, who understand what it is to be a person like me who has an idea but doesn't know how to turn it into something real. Throughout it all, all of my interactions with in2being, there was that clarity that they are there to help me take my idea to the next level. In many cases, that meant giving me information or ideas I hadn't thought about based on their expertise, which they are always very willing to share.

Dr. Daniel Taylor

Dean of the Michigan College of Optometry,
Ferris State University

My primary contact in pediatric device development recommended that I work with in2being to keep my project moving forward. When I met with them, we immediately jelled, and I began to comprehend how little I knew about the regulatory requirements and commercialization pathway, and how experienced and knowledgeable the staff at in2being were.

Dr. John Charpie

University of Michigan

Conveniently Located to Serve Your Needs

Our 3,600-square-foot office and lab space in downtown Saline, Michigan, is located just 30 minutes from Detroit Metropolitan Airport and near the University of Michigan's high-tech ecosystem. This central location allows us to provide rapid support and development services.

📍 131 E Michigan Ave, Ste E, Saline, MI 48176

Move Forward with Confidence

Bringing a medical device to market takes more than a strong idea. You need the right support to move from concept to submission with clarity.

At in2being, we help you connect product development and regulatory strategy from day one so you can reduce risk, avoid rework, and move forward with greater confidence toward manufacturing and market readiness.
